

**Steve Bradford**

*NextGen Chief Scientist, FAA*

Steve Bradford is the Chief Scientist for Architecture and NextGen Development in the FAA's NextGen Office. He is the Chairman of the Technical Review Board which monitors technical decisions related to investments and the Enterprise Architecture. He works with elements of the FAA to develop midterm plans and five-year budget requests to implement NextGen. He has a leading role in NextGen's International Engagement. He was a member of the ICAO technical team that authored the latest Global Air Navigation Plan, the past US panel member and current advisor to the ICAO Air Traffic Management Requirements and Performance Panel, and is technical advisor to the development of GANP 2019. He has a leading role in several activities with SESAR Joint Undertaking, and has led several co-operative international efforts with EUROCONTROL.
